**FIBERS** **A**

**Natural Fibers** **A 1**

Bast and leaf fibers — developments & prospects ... 780
Cellulose fibers, mechanical properties ... 730
Cotton, broader use possible spinners are told ... 780
Cotton — how 1951-52 crop will run ... 780
Cotton mechanization, mills must prepare for ... 730
Cotton: years of experiment ... 780
Elastic recovery of textile fibers ... 729
Elasticity of cellulose fibers ... 729
Enzymic degration of cellulose fibers ... 880
Exterior tar spots concentration 10 times that inside bale ... 880
Frictional properties of wool ... 729
Inter-fiber friction ... 781
Lumen contents of cotton fiber, microscopical observations ... 729
Measurement of fiber length ... 925
Primary wall of the cotton fiber, observations ... 730
Silk — historical survey ... 781
Swelling capacities of fibers in water. I ... 925
Swelling capacities of fibers in water. II ... 925
Textile materials, identification ... 780
The effect of micro-organisms and of weathering on cotton textiles. II ... 926
What the natural fibers are doing ... Feb. 15
Wool-molecule, how it works. Significance in biology and medicine ... 780

**Artificial Fibers** **A 2**

A scheme for fiber identification ... 881
Animal protein synthetic has wool-like composition ... 731
Anti-static composition ... 881
Cellulose-derivative rayons, past, present and future ... 781
Dynamic modulus of elasticity of viscose fibers ... 926
Dynel shows high resistance to chemicals in tests ... 731

Artificial Fibers *(continued)* **A 2**

Elongation — tension test ... 831
Fast dyeing properties feature new X-51 acrylic fiber ... 927
Fiber structure and pulp properties ... 731
First man-made fiber, small French town saw birth of ... 831
Functional qualities of X-51 ... 927
Hydrogen peroxide useful in making viscose ... 831
Identification of textile materials ... 733
New methods for new fibers ... 881
Orlon's functional qualities advantageous to consumers ... 927
Orlon makes rapid progress ... 782
Orlon work clothes made on commercial scale ... 782
Predicts dynel will be most economical of acrylic fibers ... 928
P.V.C. fiber, future of ... 732
Rayon and synthetic fibers ... 831
Says new synthetics have place in Marine Corps use ... 928
Synthetic fibers, chemical and physical properties ... 781
Synthetic fibers, type and properties of ... 832
Synthetics, newer, dominate AATCC convention ... 733
Synthetics, urges ingenuity, initiative be used to advance ... 832
Textile fibers from synthetic resins ... 832
The effect of micro-organisms and weathering on man-made fibers. I ... 926
The link between plastics and textiles ... 882
Two fibers often better than one ... 733
Vicara now used in many blends ... 929
Wonder fibers . . . challenge to management ... 734
X-51 Acrylic fiber ... 832
X-51 — Meet the newest synthetic fiber ... 833

**YARN PRODUCTION** **B**

**Fiber Preparation** **B 1**

Baling machine, portable ... 833
Blending of cotton by fineness-determination ... 734

## TEXTILE TECHNOLOGY DIGEST

### *January-June 1952*

**See December 1952 Issue for Previous Six-Months Index**

**FIBERS** **A**

**Natural Fibers** **A 1**

Bast and leaf fibers — developments & prospects ... 780
Cellulose fibers, mechanical properties ... 730
Cotton, broader use possible spinners are told ... 780
Cotton — how 1951-52 crop will run ... 780
Cotton mechanization, mills must prepare for ... 730
Cotton: years of experiment ... 780
Elastic recovery of textile fibers ... 729
Elasticity of cellulose fibers ... 729
Enzymic degration of cellulose fibers ... 880
Exterior tar spots concentration 10 times that inside bale ... 880
Frictional properties of wool ... 729
Inter-fiber friction ... 781
Lumen contents of cotton fiber, microscopical observations ... 729
Measurement of fiber length ... 925
Primary wall of the cotton fiber, observations ... 730
Silk — historical survey ... 781
Swelling capacities of fibers in water. I ... 925
Swelling capacities of fibers in water. II ... 925
Textile materials, identification ... 780
The effect of micro-organisms and of weathering on cotton textiles. II ... 926
What the natural fibers are doing ... Feb. 15
Wool-molecule, how it works. Significance in biology and medicine ... 780

**Artificial Fibers** **A 2**

A scheme for fiber identification ... 881
Animal protein synthetic has wool-like composition ... 731
Anti-static composition ... 881
Cellulose-derivative rayons, past, present and future ... 781
Dynamic modulus of elasticity of viscose fibers ... 926
Dynel shows high resistance to chemicals in tests ... 731

Artificial Fibers *(continued)* **A 2**

Elongation — tension test ... 831
Fast dyeing properties feature new X-51 acrylic fiber ... 927
Fiber structure and pulp properties ... 731
First man-made fiber, small French town saw birth of ... 831
Functional qualities of X-51 ... 927
Hydrogen peroxide useful in making viscose ... 831
Identification of textile materials ... 733
New methods for new fibers ... 881
Orlon's functional qualities advantageous to consumers ... 927
Orlon makes rapid progress ... 782
Orlon work clothes made on commercial scale ... 782
Predicts dynel will be most economical of acrylic fibers ... 928
P.V.C. fiber, future of ... 732
Rayon and synthetic fibers ... 831
Says new synthetics have place in Marine Corps use ... 928
Synthetic fibers, chemical and physical properties ... 781
Synthetic fibers, type and properties of ... 832
Synthetics, newer, dominate AATCC convention ... 733
Synthetics, urges ingenuity, initiative be used to advance ... 832
Textile fibers from synthetic resins ... 832
The effect of micro-organisms and weathering on man-made fibers. I ... 926
The link between plastics and textiles ... 882
Two fibers often better than one ... 733
Vicara now used in many blends ... 929
Wonder fibers . . . challenge to management ... 734
X-51 Acrylic fiber ... 832
X-51 — Meet the newest synthetic fiber ... 833

**YARN PRODUCTION** **B**

**Fiber Preparation** **B 1**

Baling machine, portable ... 833
Blending of cotton by fineness-determination ... 734

Fiber Preparation *(continued)* B 1
Cotton opener developed for air-free cleaning ... 734
Cotton opener, Saco-Lowell developing new-type ... 735
Improved laps, result of correct opening-picking setup ... 783
Lapper reversing unit, announces ... 833
Mechanical cotton blender for testing laboratories ... 735
New Opener line improves yarn quality and strength ... Feb. 51
Oils — fire hazards in woolen industry ... 782
Opening and picking requirements for a print cloth mill ... 833
Pepperell blends cotton by fiber fineness ... 735
Picker evener adjustment made easy — fewer off-weight laps ... 784
Picker inspection pays dividends ... 784
Picker lap rods, holder for ... 783
Picker lap selection for tests on lap meter ... 736
Picker-shredder, see processing plants using ... 785
Processing reworkable waste for fine yarns, improved method ... 783
Processing suggestions for 15% dynel — 85% wool blends ... 784
Production costs, ASME discussions ... 782
Rag picking vs. picking and shredding ... 834
Sample blending ... 784
Trash removal from cotton, discussion ... 735
Waste control —picker room ... 734
Wool blending, we check with ultraviolet light ... 785
Wool mills urged to handle blends carefully ... 834
Wool stock handling mechanized ... 736

## Carding and Combing B 2

An electromagnetic drive for a textile card comb ... 882
Card and drawing sliver regularity discussed ... 882
Card coiler gears, repair replacement ... 738
Card room waste is too high, if . . . ... 737
Card, spinning frame brought out in Germany, new ... 785
Continuous stripper, theory of the ... 835
Cotton research clinic hears how better yarn behavior obtained with higher card speeds 883
Crimp at drawing, neps, and U-pin crade ... 834
High licker-in speed permits 40% increase in card production ... 929
Irregularity of slivers ... 785
Length controller, automatic ... 737

Carding and Combing *(continued)* B 2

Long staple fibers—a developing trend ... 883
Nep controls, helpful comments ... 737
New cotton card shown at Milan Fair ... 929
New type of noil collector improves Wamsutta's combing operation ... F-52
Paint card lap rolls—eliminate break-backs ... 883
Reducing waste in card room ... 786
Sliver coiling mechanism ... 786
Special open gill box to print combed sliver ... 834
Strip-O-Matic clothing now made for cotton and fine wool ... 738
Systematic card of card clothing is worthwhile ... 786
"Synthetics" topic of wool carders meet in Boston ... 786
Table permits standard nep counting method ... 883
Tests reveal card maintenance needs ... 884
Tips for woolen and worsted mills from editors' notebooks ... 738
To reduce neps . . . do these things ... 929
Woolen card accessories announced by Whitin ... 884

## Drafting and Roving B 3

Altered caliper measures roll space ... 884
Poor quality cloth traced to faulty drawing sliver ... 885
Profits from effective textile machinery lubrication ... 738
Metallic drafting for roving seen possible ... 786
Roving draft calculations by nomograph ... 786
Short-wave variations in cotton rovings, caused by machinery defects in speed frames ... 787
Textile drawing roll ... 885
Variation at drawing ... 787

## Spinning B 4

ASME speakers discuss Pot spinning, Pacific Converter ... 739
Bunch building mechanism for spinning or winding machines ... 739
Cold cleaning method for spinning frame spindles ... 836
Converting textile filaments, process and machine for ... 740
Cotton yarn irregularity and high drafting ... 788
Dyeing of nylon, yarn producer's problems in 791
End breaks and front roll speeds in spinning, discussion ... 837
Ends down in spinning, reduce ... 790
Electro-magnetic brakes on textile machines ... 788

Spinning *(continued)* B 4
Famous name parts and materials contribute to new Gwaltney frame ..... 929
Gear-driven spindle on spinning machine ..... 837
Handle for spinner's hook ..... 788
Hannah develops cap spinning unit ..... 930
Higher production, lower upkeep features new spinning frame ..... 930
Increase package size by one-half on coarse counts ..... 930
Large packages on Whitin F2 frames ..... 837
Lubrication of textile machinery, profits from effective 5. Spinning and twisting ..... 789
Machinery, making new out of old, with spinning changeovers ..... 789
McCann 100-pot spinning frame ..... 740
Mills clean up with continuous cleaning ..... 837
New cotton shown at fair in Milan, Italy ..... 931
Nomatex double twist spindle ..... 837
Nylon-bearing rolls eliminate lubrication ..... 740
Nylon staple on the cotton system: processing aspects and yarn properties ..... 789
Oiling in worsted and woolen yarn manufacture ..... 789
"Over-drive" spinning tape features "hinged" center ..... 886
Procedures for spinning, weaving, knitting X-51 fiber ..... 931
Processing filament rayon yarn requires attention to details ..... 886
Production, easy way to balance ..... 788
Ring frame can spin soft-twist yarns like mules ..... 838
Ring frame for wet spinning of flax and hemp ..... 838
Rubber waste elimination in Bradford-spun worsteds ..... 739
Slubs, gouts and other yarn imperfections ..... 838
Spindle tape, patent on ..... 789
Spinning and weaving X-51 acrylic fiber ..... 887
Spinning frame drafts changed by levers ..... 931
Systematic scouring ..... 838
Top rolls with nylon bearing surfaces ..... 790
Traveler cleaners on spinning frame ..... 791
Two-speed driving of spinning frames ..... 838
Uses and application of fiber and spinning tests ..... 839
Whitin American system ..... 741
Woolen ring frame spinning, studies. II. Draft and twist distribution ..... 790
Worsted spinning, quality and production ..... 790
Yarn variation cut by more than 25% ..... 741

**Winding and Spooling B 5**

Automatic hosiery cop winding ..... 742
Automatic stop gauge for winding machines 741
Winding and Spooling *(continued)* B 5
Brush installations, special ..... 792
Combination thread guide and clearer for winders ..... 889
Self-contained four-spindle automatic winders ..... 889
Slubbers make good twisters ..... 791
Snap-on cone holder, new ..... 839
Twister belts, how to get better service from ..... 839
Twister bobbin capacity ..... 840
Whitin twister processes continuous filament yarns ..... 742
Winding slippery yarn on a drum winder ..... 890
Yarn controlling and tensioning mechanism ..... 840
Yarn package and method of winding ..... 840

**Yarn Processing B 6**

Acetate package support prevents yarn slipping ..... 841
Rapid drying of yarn spools ..... 841
Rayon cake wrappers ..... 931
Rubber package holder ..... 841

**Yarn Application B 9**

Fluorescent yarns ..... 792
Tire cord, equipment for stretching ..... 792
Thermoplastic yarns, molding of ..... 793
Treatment of textile materials ..... 842
Treatment of textile materials ..... 842

**Yarn Testing and Numbering B 10**

Fatigue test on tire cords, effect of ..... 743
Mechanical strength of filaments, measurement and physical interpretation of ..... 743
Polyamide rayon, extension and shrinkage in aqueous-phenolic solutions ..... 743
Uster introduces three testers ..... 743

## FABRIC PRODUCTION C

**Yarn Preparation C 1**

Automatic regulation of "Take-up" ..... 744
Beam brake provides improved tension control, reduces run-out waste ..... 793
Builder for fine yarn warp frames ..... 744
Drawing-in costs, mill makes drastic cut in ..... 795
Electric stop motion, new ..... 793
Lubrication, textile machinery, profits from. 6. Slashers: ..... 795
Machine speeds up warp beaming ..... 794
New approach to metering claimed for new device ..... 932
New beam brake designed for cotton slasher creels ..... 933

Yarn Preparation *(continued)* C 1
Nylon size, new ... 795
Polyacrylic acid for sizing nylon ... 795
Shirley regulator seen controlling amount of size on warp at tape frame ... 891
Size formula for rayon-cotton blend ... 796
Size formula for rayon-cotton blends, discussion ... 745
Slasher cover, highly efficient ... 794
Slasher for processing blends ... 892
Slashing and weaving methods for most satisfactory results ... 843
Slashing and weaving practices, Georgia mill's ... 794
Slashing troubles enumerated ... 843
Slashing weaving ... 843
Southern Textile parley, methods and maintenance feature ... 745
Starch mixing plant, new ... 843
Tips from the size box ... 796
Viscometer for homogenizer use ... 745
Viscosity of homogenized size measured ... 745
Warping continuous filament acetate rayon from bobbins ... 796
Warp size, continuous flow of ... 844

**Weaving C 2**

Art, color and design in fabrics, basic principles involved ... 797
Carpet-Inspecting tables eliminate handling ... 746
Catch cord tension for Jacquards ... 746
Check strap, Dayton's new ... 844
Costly weave defects may be due to faulty bobbins ... 844
Electric stop motion, new ... 845
Fancy weaving plant uses odd yarns in selvage ... 746
Graphical analysis of fabric geometry ... 893
Handling—ten ways better, Livingston Worsted Mills, Inc. ... 747
Harness coupler, new ... 797
Harness frame eye prevents damage to adjacent frames ... 844
How to move a loom in 14 minutes ... F-49
Improved double lift double cylinder jacquard ... 894
Let-off motion eliminates weights behind them ... 746
Light on Southern Mills, new ... 748
Lock plate prevents outside hooks or eyes from turning ... 797
Long dobby chains eliminated with new attachment ... 747
Loom beam head lock ... 845
Loom design and improvement, modern ... 797
Loom stops, when you should worry about ... 799

Weaving *(continued)* C 2
Operations speeded when inspector dictates to burler ... F-49
Picker stick breakage, how to avoid excessive ... 797
Practical terry weaving and designing. Article 5 ... 896
Reed cleaning and polishing with warp drawn in ... 896
Selective battery system for making multi-color fabrics ... 896
Shuttleless loom ... 748
Slashing and weaving, mill men discuss ... 845
Terry weaving and designing, practical. 3 and 4 ... 798
Warp-shed tester evaluates slasher size ... F-50
Warp weighing motion, new ... 845
Weaving efficiency aid ... 799
Weave room cleaning ... 799
Yarn tester imitates loom action ... 799
You can reduce your shuttle-fur costs ... 989

**Knitting C 3**

Electronic beam let-off ... 845
Hosiery turner, pneumatic ... 848
How Brookshire Knitting Mills met the vibration problem ... 849
Jig for bending back-pickers ... 749
Knitting ... 850
Knitting show ... 750
Nail polish found useful in knitting applications ... 750
New attachments for seamless nylon machines ... 846
Pattern control for knitting machines ... 847
Plastic aprons reduce seconds ... 846
Plating on straight-bar machines ... 847
Polishing tools ... 750
Reiner introduces new tricot model ... 751
Right angle feature prevents wrinkling ... 846
Roanoke Mills, Inc. ... 850
Rocking mechanism for seamless hosiery machines ... 848
Setting hosiery, etc. ... 848
Short springs, device for making ... 845
Straight knitting machine ... 848
Tension on rayon in knitting ... 900
The Thing ... 751
Thread cutting in knitting machines ... 849
Thread distribution in straight bar knitting machines ... 849
Tricot knitter features improved brake controls ... 846
U-bolt reinforcement for loom pickers ... 847

**Special Fabrics C 4**

Abradoflax — abrasion resistance tester ... 851

Special Fabrics *(continued)* C 4
Acetate pile fabrics ... 752
Cut burling and mending costs by studying causes of defects ... 851
Detectice work in the mill ... 851
Duck mill makes novelty fabrics ... 800
Fabric construction and mercerization ... 851
Film-webs, apparatus for producing ... 800
Hy-du-lignum picker sticks to be sold in USA by US Bobbin & Shuttle ... 901
Loop surfaced, novelty fabric result of good use of acetate yarns ... 933
Swiss fabric ... 852
Textile fabric ... 852
Textile materials, treament ... 852
Twisted dyed waste with spun silk to create rough textured crash ... 753
Two-ply filament warp yarns to produce soft dress gabardine ... 753
Uniformity of fiber sheets in non-woven fabrics ... 850
Vacuum impregnation used in lace making ... 801
Vicara blend suitings given good report ... 934
Vinyl coated fabrics ... 850
Wave rayon crepe given luster through use of ply filling ... 800

**Inspection and testing C 5**

Carpet inspection and mending tables ... 852
Chasing fabric faults ... 934
Looping ladies' hosiery ... 852
Looping seamless nylon stockings ... 853
Marhen method for controlled vat dyeing ... 853
Mixed sizes cause trouble finishing ladies, hosiery ... 853

## STANDARD FINISHING D

American visit to W. Riding ... 754
Announces new squeeze roll unit ... 935
Baking resin prints by gas ... 854
Boosts hosiery sales appeal ... 802
Carbonizing range, continuous ... 802
Care of cropping machinery ... 935
Decating machine ... 854
Detergency evaluation. III ... 855
Dialysis of caustic soda solutions ... 754
Discoloration of fur felt ... 902
Drying machine design ... 855
Dyeing and finishing ... 855
Felt processing machine ... 754
Finishing rayon crepes ... 755
Fulling methods, old ... 803
Galtman's R. I. sponging plant ranks with finest in country ... 855
Gas-heated finishing processes ... 855
Heated drums for drying ... 856
Heat setting nylon tricot, background for ... 853

Standard Finishing *(continued)* D
High speed butt-end seaming machine ... 755
High speed piece-end sewing machine ... 903
Hosiery calender newly designed ... 904
Impurities, removal from crey cotton. I. Developments in plant for alkali boiling 804
II. Experiments with an alkali pad-steaming sequence ... 804
Laundering, progress 1851-1951 ... 803
Methods of cropping ... 936
Milling, theories ... 804
Modern drying machines ... 903
Modern finishing in the Hebrides ... 936
Monopole oils ... 856
Plain weaves for dress wear ... 903
Pneumatic guider for tensionless finishing ... 755
Preparation and bleaching of cotton piece goods — 3 ... 756
Pull thread mending machine ... 857
Rayon and synthetic fibers ... 857
Rayon and synthetic fibers ... 904
Redman knit goods shrinking range ... 803
Selvage trimmer (self-contained) for piece goods ... 804
Shrinkage and drying of tubular knitted fabrics ... 857
Skin-irritation tests ... 858
Soap for textiles ... 756
Substantive softener that works with anionics, new effects possible with ... 856
Tar spots, another source ... 754
Textile-chemical supply prospects, what about ... 757
Textile finishing agents, identification scheme ... 755
Textile finishing, survey of ... 756
Textile mill keeps modern with latest drive equipment — Gregg Plant of Graniteville ... 803
Textile preservative ... 905
The principles of textile finishing ... 905
Torridon survey of scouring practice ... 757
Tubular knit fabrics, treatment of ... 858
Two new machines by Union Special ... 805
Welt racks and trucks, special ... 804
Wool setting processes ... 858
Woolen and worsted scouring. I ... 757
Wool washing, application for the study of mechanical action in ... 802

## DYEING AND PRINTING E

Acetate rayon dyes use in textile
Acetate rayon dyes use in textile printing ... 812
Acid dyes sorption by nylon under nonequilibrium conditions ... 762
Agents against gas-fading ... 937
Azoic dyeing of yarns, developments in ... 807

Dyeing and Printing *(continued)* E

Bates saves time and labor in package dyeing ... 805
Behavior of acid dyes in steaming ... 905
Better, more economical dyeing of synthetics reported ... 938
Care and handling of back greys ... 906
Cellulose acetate and vat dyestuffs ... 758
Chrome process ... 859
Chromiferous azo dyestuffs ... 758
Chromiferous azo dyestuffs ... 859
Colorimetric determination of indigo ... 806
Coloring, recent advances in ... 862
Colouring hides and skins ... 938
Continuous dyeing of new synthetic fibers ... 906
Continuous dyeing processes with water-soluble dyestuffs ... 758
Controlled Vat dyeing possible with new Marhen method ... 806
Device to measure color developed by Hatboro firm ... 939
Direct dye application to viscose rayon yarn and staple ... 805
Dispersible dyestuff powders ... 859
Dope-dyed viscose staple discussed ... 860
Dye beam, construct successful ... 806
Dyed and crimped staple ... 907
Dyehouse built for control ... 760
Dyeing acetate with Indigosols ... 759
Dyeing at the turn of century ... 759
Dyeing cellulose acetate ... 759
Dyeing of cellulose yarn ... 808
Dyeing p.v.c. textiles ... 860
Dyeing X-51 acrylic fiber ... 939
Dyestuff carriers in printing ... 760
Dynel, dyeing and finishing in Kersey blends ... 760
Drying reel for screen printed fabric ... 807
Electrolytic stripping process ... 907
Evolution and development of dyeing in carpet industry ... 808
Experiments in union dyeing ... 940
Felts, manufacture and dyeing of ... 809
Fixation of acetate prints without steaming ... 860
Gas fading ... 940
Gast color printing ... 808
High-speed machine coats fabrics with dyes and paints ... 808
Hose finishing machine ... 940
Hosiery dyeing, practical survey of ... 810
Hunter open with dye kettle ... 941
Improved wash fastness ... 908
Levelling on nylon ... 908
Lustrous printed effects ... 760
Measuring the pH ... 941
Modern continuous dyeing processes ... 909
Modern hose dyeing ... 942

Dyeing and Printing *(continued)* E

Molten metal tests ... 909
Novel mordants ... 761
Package dyeing with vat dyes and indigosols, progress ... 810
Photochemical and thermal influences on fibers and dyestuffs ... 809
Pigment binders ... 861
Pigment dyeing ... 861
Printing acetate with vat dyes ... 861
Printing furnishing fabric ... 909
Printing rollers, adjustment of ... 858
Printing with acetate dyes ... 862
Prospect before us ... 810
Rayon and synthetic fibers ... 761
Rayon and synthetic fibers ... 862
Rayon staple — a dyeing miscellany ... 810
Redox potential recorder for the Marhen process of vat dyeing ... 862
Reduction of direct viscose rayon dyes ... 762
Rise and fall of Turkey red ... 942
Rodney Hunt introduces new series dye beck ... 863
Roller printing of dynel developed ... 863
Screen frames, adjustable ... 757
Screen printing table ... 762
Screen printing without squeegee ... 910
Silk tensioning device for screen printers ... 863
Simultaneous and dyeing of wool both in the stock and on pieces ... 864
Slubbing dyeing dyes, evolution of ... 808
Stenter printing machine ... 910
Successful working of fully automatic screen printing machine ... 943
Sulphur dyes application to loose cotton and yarns, developments in ... 807
Synthetic dyes for cellulosic fibers, milestones in the production of ... 809
Tendering vat dyes ... 944
Textile embossing plates using aluminum foil ... 864
Textile printing, studies in fundamental process. III. Transfer of indigosols to cellulose during steaming ... 811
The Marhen Process ... 941
"The Tincotorial Arts" ... 811
Trends in dyeing technique ... 910
Unlevel dyeing of cotton cellulose, causes. Influence of mercerizing and bleaching processes ... 806
Up to ten colors on Italian automatic screen printing machine ... 910
Vat dyes application to viscose rayon cakes, advances in ... 805
Vat dye polyester fiber, new method to ... 809
Vehicle aids printing with contrasting brilliant colors ... 911

Dyeing and Printing *(continued)* E
Viroureux top printing machine 812
Warp printing machine 763
Wool dyes, rise and development of 810

## SPECIAL FINISHING F

Acetate fabrics bounded with P. V. C. 812
Anti-static treatment 812
Application of flock by pneumatic means 912
Army Quartermaster Corps develop new water-repellent thread 944
Collins and Aikman process, new (foam rubber backing for carpets) 765
Combination fungicide for cotton duck 813
Controlled anti-felt treatment 864
Duck fabrics, treating 763
Durable shrink and crease resist 865
Evaluate finishes on basis of fabric performance 913
Finishing of fashion fabrics 764
Fireproofing composition 813
Fireproofing process 813
Flameproofing of fabrics 814
Fungicide can be mixed with water 814
Hosiery finishing system promises better dulling 913
"Kelpie" anti-shrink process for woolens available in U.S.A. 765
Multi-ply fabrics 765
Non-fraying fabric labels 865
Practical acetylation of cotton 814
Permanent anti-fungus, anti-mildew, and and anti-deterioration agent 914
Resin anti-felt treatment 865
Resin finishes for textiles 766
Shrinkproofing fabrics 815
Stabilizing cellulose fabrics 766
Trade name chart of finishes for rayon, acetate, and synthetics 866
Treating duck fabrics in finishing, discussion on 813
Useful life of tobacco shade cloth tripled by new process 915
Washable rayons with new Dan River finish 764
Water insoluble resin 815
Water repellent products, why best results are not obtained from 866
Water-repellent textiles resistant to mildew 815
Wool anti-felt process, machinery for 765

## TESTING AND MEASUREMENT G

### Clothing and Fabrics G 1

Construction effects on laundering shrinkage of wool fabrics 767
Fixed standards for staining assessment in fastness testing 815
Clothing and Fabrics *(continued)* G 1
Soil measurement tests win AATCC prize for N. Y. 766

### Instruments and Instrumentation G 2

A method of repetitive longitudinal sectioning of cords and fabrics for microscopic examination 916
ASTM Standards on Textile Materials 816
Control Laboratory, comments on 767
Correcting range values 816

## TEXTILE TECHNOLOGY DIGEST

## *June-December 1952*

**See June 1952 Issue for Previous Six-Months Index**

**FIBERS** **A**

**Natural Fibers** **A 1**

Check sample testing of physical properties of cotton with instruments ... 1043
Color shading and grading ... 1068
Cotton breeder research saves millions for mills ... 979
Cotton merchant offers technical service ... 1107
Cotton's minor constituents ... 1068
Cotton standards changes rapped by textile mills ... 979
Cotton stands to gain in blending of fibers ... 1107
"Dangerous trend" in ginning raises mill costs, lower quality ... 1068
Density of cellulosic fibers ... 1016
Dynamic friction of viscose fibers ... 1043
Fiber structure ... 944
Georgia-South Carolina cotton buyers consider problems ... 944
Great adventure of fiber structure ... 1016
Moisture relations of textile fibers at high humidities ... 944
New method determines cotton maturity, fineness ... 1107
Non-felting wool and wool mixtures ... 944
Physics of textile fiber ... 1107
Problems in the dyeing of wool with chrome blacks ... 1068
Properties of apparel wools; modification of fiber surface during worsted processing ... 1043
Properties of thermo-plastic fiber-bonded fabrics ... 1016
Supercontraction of keratin ... 1044
Swelling of human hair in water and water vapor ... 1044
Textile Institute told of Govt. blend studies ... 944
Upgrading medium and low-grade cottons ... 944
Viscosity measurements ... 945
Visualizing position of fibers in sliver ... 1108
Wool bureau's research seminar at Lowell ... 945

**Artificial Fibers** **A 2**

Ardil: Properties and uses ... 946
Assessing the structural irregularity of man-made fibers ... 1069
Cotton systems adjustments made in processing acrilan ...
Crimping of rayon staple ... 947
Degradation of nylon on exposure to light ... 1069
Development of rayon ... 1071
Dynamic stress-strain properties of viscose rayon ... 1017
Effect of the newer fibers on the market for viscose ... 980
Evaluating a new fiber ... 947
Fabrics from fiber blends ... 1069
Fibers ... 1070
Fiber friction ... 1017
Fibers Identification ... 1108
German producer develops fiber ... 981
If you want to change over to spun synthetics ... 1070
Outstanding and deficient properties of some common textile fiber materials ... 1071
Performance standards for rayon, acetate, mixed fibers ... 1072
Photoelectric examination of artificial fibers 1109
Properties of wool-nylon blends ... 980
Properties of wool-nylon blends ... 1017
Rayon staple yarns spun on different systems ... 1045
Spun dyed Fibro is on the way ... 947
Synthetic fiber ... 1046
Synthetic fiber yarn manufacturing discussed by South Carolina S. T. A. ... 948
To handle synthetics, train your employees ... 1071
50-50 vicara-nylon blend spins well ... 946
Water-soluble filaments and films from methyl cellulose ether ... 1072
Water sorption by viscose at low humidities 1109
What can vinyl fibers impart to rayon and spun rayon? ... 1017
Where are we going in blends? ... 1110
Where are synthetics going? ... 1072
X-51 fiber moth proof, easily cleaned ... 1110

## YARN PRODUCTION B

### Fiber Preparation B 1

Application of ultrasonic energy in wool scouring ... 1046
ASME textile division told of two new wool blending systems ... 1017
Better cutting of thread waste with new machine ... 948
Bruck mills installs fiber conditioning ... 981
Continuous scouring of woolen, worsteds, and blended fabrics by modern methods ... 1073
New fiber conditioning machine ...
Now you can grade cotton with a laboratory instrument ... 1046
Off-shade and cloudy fabrics ... 1046
Picker pulverizes hard wool tags ... 948
Stock vat exhaust process for machine dyeing ... 1018
Two new wool blending systems ... 981
Wool blending begins at the opening room ... 948

### Carding and Combing B 2

Alabama TOE discusses means to higher card production ... 981
A new brush for card flats ... 982
A new brush for card flats ... 1018
Another step toward better carding ... 1047
Blends of acetate staple and other fibers ...
Card sliver variation can be reduced ... 1018
Controlling card roving weights ... 1073
Controlling wool card roving weights ... 1047
Effect of fiber fineness on nepping of card web ... 1047
Handling synthetics on the woolen system ... 1073
Handling synthetics on the worsted system ... 1074
High licker-in speed permits 40% increase in card production ... 948
How to increase capacity of present card-sliver cans ... 982
Major problems in woolen carding ... 982
Major problems in woolen carding ... 1019
Proper ginning can reduce neps 25% ... 982
Processing synthetics on the woolen system 1074
Sliver tester measures fiber lengths ... 1110
Slow card grinding reduces neps ... 1047
Tips on carding and combing of wool-and-synthetic blends ... 983
Two new wool blending systems ... 1074
Upgrade medium and low-grade cottons ... 949
Variable-speed intermediate feed improves card roving ... 982
What happens when you speed up cotton cards? ... 1075
What's being done about static electricity? ... 983
Worsted mill analzes card-grinding methods 1075

### Spinning B 4

American system produces quality yarns for 10 cents per pound less ... 985
A new device for the cleaning of spinning frames ... 1076
A small yarn mill cut labor costs 33% ... 985
Cost-cutting equipment review—yarn preparation ... 1111
Cost-cutting equipment review—twisting, winding, warping, slashing ... 1110
Cop-type bobbin and package wound thereon ... 949
Factors affecting the translation of certain mechanical properties of cordage fibers into cordage yarns ... 1077
Fluid control mechanism for driving winding machines ... 1049
French system offers flexibility, ability to compete ... 985
Improvised roving bobbin stripper ... 949
Mills can now measure roll weighting accurately ... 950
Modified Bradford system requires fewer machines, operators ... 986
New English instrument measures yarn variations ...
New variable speed drive facilitates frame speed changes ... 1077
Processing synthetics on the cotton system ... 1078
Rayon spinning process—new ... 1111
Ring spinning machine ... 950
Roth single-belt unit can now be converted to double-belt drafting system ...
Setting up spinners' job loads in a specialty mill ... 950
Six things to look for in your twister-ring grease ... 986
Skewer ... 950
Spinning frame makes yarn from sliver ...
Spinning technology and practice of rayon staple ... 951
The new era filling spindle ... 1049
This mill knows why its frames are stopped 951
Turn rings and plumb spindles ... 951
Twist as factor in yarn regularity ... 1111
Yarn balloon separating rings for ring spindles ... 1021
Yarn twister for spinning frames ... 951

### Winding and Spooling B 5

All-purpose guide for universal No. 50 winders ... 952
Careful control of all factors is the secret of handling continuous filament ... 1079
Counting and recording apparatus ... 952

Winding and Spooling *(continued)* B 5
Machine cleanliness is vital to quality throwing of nylon 1080
Machine detects slubs, cuts yarn for removal 1112
New machinery: Soft package attachment for winding dye tubes 1080
New Muschamp "Supercop" winder 988
Packaging unit 952
Stretching automatic motions to the limit 988
Stretching automatic motions to the limit 1081
Thread guide material next to diamond in luster retention 1081
Unirail uptwister and Uniflex spindle announced by Universal 989
Work load calculations for winding machines 1081

**Yarn Application B 9**

Anti-static agent 952
Bonding viscose rayon and rubber 952
Cold water yarn conditioning and twist setting machine made in several sizes 953
Mercerization of mixed yarns 953
Significance of quality control 989
Steaming of textile materials 1082

**FABRIC PRODUCTION C**

**Yarn Preparation C 1**

An electronic high speed warping machine 990
Automatic start-stop controller 990
Beam brake provides improved tension control, reduces run-out waste 1082
Beam storage racks 1083
Cotton and synthetic warp preparation 953
Evaluation of textile sizes 1050
Factors influencing yarn tension in warping 1051
High speed beaming at low uniform tension 990
Homogenizer handles 800 gallons per hour 954
Hot air slasher features high production, less shedding 1083
Infra-red heaters for textile drying must be properly selected 991
Mill answers to 16 spinning, warping, and winding questions 991
Mill eliminates size cooking and storage kettles 1051
Multi-can slasher versatile 1112
Pressure-cooked and stored size eliminates heat loss and crusting 1083
Quality control at Avondale Mills 1083
Sizing rayon yarn 1112
Slasher dryer using gas devevloped at SRRL 992
Slasher head end unit 1083

Yarn Preparation *(continued)* C 1
Slashing synthetic fibers 954
Slashing synthetic fibers 992
Ultrasonic viscosimeter for plant and laboratory use 954
Warp storage 990
Watch angularity of yarn in warping synthetics 992
Yarn tension in warping, factors influencing 1023

**Weaving C 2**

A new, quick way to set your Knowles head motion 1083
A new reed grinding and polishing machine 993
A new Saurer automatic loom 1052
Apparatus for handling tubular textile fabrics 954
Bobbin guide protector for bobbin changing looms 993
Bobbin guide protector for bobbin changing looms 1084
Bobbins conveyor control pays off
Causes of barre cloth—a survey of 67 mills 993
Cost-reducing equipment revivew—weaving 1112
Eccentric drive gearing may improve loom performance 1084
Filling control in weaving synthetic yarns 1085
Fix your Roper let-off to stop wavy cloth 1085
Getting loom lay movement de-synchronized 994
German knot-tier with 4 units said to be versatile 1052
How good are your loom fixers? 995
Italian narrow-fabric loom inserts 450 double picks per minute 1085
Loom-bobbin finish is integrated into the wood 1086
Mill positively controls filling at the loom 1085
New cotton looms 1113
New reed grinding and polishing machine 1023
New warp let-off motion designed for high speed knitting machines 1086
Paper fabric manufacturing needs close quality control 1087
Stroboscopic measurements at the loom 996
Studies in textile design 1024
Swiss loom with patented magazine 1113
Table cloth weaves with cross-border dobbies 996
Temples without rolls developed at Clemson 1089
Trouble with taffeta 955
Two new ideas in weave-room organization 1089
Use seven battery gauges to set high-speed looms 997
Use uniform loom settings to improve cloth appearance 1090

Weaving *(Continued)* C 2
U. S. Rubber's novel sample method ... 955
Warp tension is constant on C-4 looms at Clemson ... 1090
Weaving synthetic yarns ... 1052
XD loom with 2 x 1 filling mixing unit ... 1113

## STANDARD FINISHING D

Achieving maximum efficiency in textile drying plants ... 1090
Automatic program controller for chlorinizers ... 956
Brown line is destructive ... 998
Continuous bleaching range is flexible and efficient ... 1091
Cost-cutting equipment review—finishing ... 1113
Crease and soil resistant cottons ... 997
Electric calender improves ribbon finishing 997
Finishing with the urea formaldehyde resins ... 998
High-temperature fixing of fully synthetic fibers ... 1025
How to get square cloth in wet processing. 1057
Machinery built for the job, used by men with know-how, makes finishing pile fabrics seem easy ... 1091
Napping energy indicator provided for Gessner machines ... 1091
New softening agent for cotton, rayon, acetate, nylon ... 957
Non-chemical water treatment process and equipment ... 957
Portable viscosimeter ... 957
Scouring woolens oiled with good oleines ... 957

## DYEING AND PRINTING E

Acrilan dyeing ... 1115
ACS told of dyes to make textiles water repellent ... 1057
Affinity of acetylated viscose for dyes ... 998
Applies spectrophotometry (1) Color matching with the aid of the "R" cam ... 1057
Automatic yarn package dyeing ... 957
Batch dyeing ... 1058
Blends—How to handle them in bleaching and dyeing ... 1091
Bond machine demonstrated ... 1114
Color correction by photocolorimetric means 1114
Color fastness of dyed acetate ... 998
Color shading and grading ... 1026
Continuous fiber dyeing ... 999
Dacron dyeing ... 1115
Danish jig saves time, dye, chemicals ... 1092
DuPont's Barotor ... 1092
Dyeing at high temperature ... 1026

Dyeing and Printing *(continued)* E

Dynel dyeing ... 1115
Embossing and printing of coated fabrics ... 1095
Estrocon Process ... 1116
Factors influencing the fastness of cotton dyeing ... 999
Faults in textile printing ... 999
For good results with the hot oil process ... 1093
High temperature dyeing ... 1059
Hot oil dyeing ... 1094
How to do the best job with your pad-steam range ... 1093
Leveling of dyes ... 1094
Mill-made ultra-violet viewer ... 958
New developments in dyeing cellulose-acetate yarn ... 1000
New print ager speeds production over 300% ... 1093
Newest idea for pressure dyeing, DuPont's Barotor ... 1093
North Carolina Finishing Co. is dyeing with hot oil ... 1094
Nylon textiles dyeing ... 1095
Orlon dyeing ... 1115
Oxidation-reduction potentials of vat dyes . 1027
Package dyeing. I. W. Theoretical model and its relation to technical practice ... 959
Relation between certain defects in dyed fabrics and mechanical damage in wet processing ... 1094
Rubber-proofed fabrics ... 1113
Shading and grading ... 1026
Silicon-containing azo dyes—Part III ... 1058
$40,000 solves dyehouse waste-disposal problem ... 1000
Tendering vat dyes ... 960
Vat dyeing ... 1116
Vicara dyeing ... 1115

## SPECIAL FINISHING F

After treatments of direct cotton dyes ... 1002
Army quartermaster corps develop new water-repellent thread ... 961
Bonding vulcanized rubber to fabrics ... 1001
Choose the proper components to compound vinyl coatings ... 1095
Copper 3-phenyl salicylate—a textile preservative ... 1060
Crease and soil resistant cottons ... 1095
Crease-resistant finishes for cellulosic fibers 963
Delustering terylene ... 963
Fire retardents ... 1031
Geometry of knit fabrics and its relationship to shrinkage ... 1029
New finish announced by Warwick ... 965
New finish, wrinkle resistant ... 1117

Special Finishing *(continued)* F

New machine for pleating nylon fabrics ..... 1096
Phosphorus compounds as fire retardents .... 1002
Quartermaster research on water resistance 966
Resin after treatment of direct cotton dyes .. 1031
Rot proofiing jute textiles ..... 1003
Stabilization and shrinkage control ..... 1061
Urea-formaldehyde fixation on viscose rayon ..... 1032
Urea-formaldehyde-resin finishing ..... 1096
Using the silicones as water repellents ..... ..
Water-repellent thread ..... 961
X-2 treatment ..... 966

## TESTING AND MEASUREMENT G

### Instruments and Instrumentation G 2

Abradoflex-abrasion resistance tester ..... 1004
Analysis of yarn forces ..... 1117
A simple apparatus for determining the elastic limit ..... 1098
Automatic yarn load-elongation recorder ... 1033
Controlling efficiency and quality at Hathaway mill ..... 1006
Determination of the degree of whiteness of textiles ..... 1098
Electric weighing recorder ..... 968
Electrostatic conductivity of textile fibers .... 968
Factors affecting rayon fabrics ..... 1063
Faxfilm evaluation of textile surfaces ..... 1118
Fluctuating tensions in yarns ..... 1006
Instruments for measuring crease-resistance ..... 1005
Instrument measures tensile strength and elongation ..... 1033
Industrial yarn classifier ..... 1005
I. T. F. M. abrasion machine ..... 1033
Measurement of fabric soiling ..... 969
Measurement of fiber length ..... 969
Measuring fabric temperature without touching fabric ..... 1118
Mechanical assessment of fabric handle ..... 1005
Microscopy to the aid ..... 970
Modified Pressley test ..... 1063
Procedure for determining yarn irregularity ..... 969
Recording fluctuating tensions in textile yarns ..... 1033
Regularity measurements on slivers, rovings and yarns ..... 1034
Review of cost-cutting equipment—regulating, controlling, measuring, testing ..... 1117
Sliver, roving, yarn uniformity tester ..... 1119
"Stelometer" cotton fiber tester measures elongation and strength ..... 1099

Instruments and Instrumentation *(continued)* G 2

Stress and strain of yarns ..... 969
Tensile properties of cards and draw frame slivers .....
Testing apparatus for determining bending resistance and elasticity ..... 969
Testing for moisture content ..... 1006
Testing of water-repellency ..... 1034
Water-permeability meter ..... 1099
Weight and moisture content, yarn ..... 1119
Wrinkling device aids study of fabric resistance ..... 1119
Yarn stresses during processing and their determination ..... 970

## TEXTILE MILLS H

Address of president of Southern Textile Association ..... 1007
Air conditioning of mills spurs production and efficiency ..... 970
Alabama textile convention ..... 970
Aluminum brings economies to the materials handling field ..... 1100
Balance agriculture with industry ..... 971
Bugaboo of the third shift decried at Georgia meeting ..... 971
Care and maintenance of belt, chain and gear drives ..... 1100
Cloth mills step up schedules as retailers restock their shelves ..... 1035
Comments on the results of the 17-mill test on ginning procedures ..... 1007
Cost-cutting equipment review—conditioning and heating ..... 1121
Cost-cutting equipment review—materials handling ..... 1122
Cost-cutting equipment review—power generation and transmission ..... 1122
Cost-cutting equipment review—waste handling, supplies ..... 1122
Determining roving package sizes, cost variables ..... 1121
Elimination industrial smog ..... 1122
Few mills pension hourly wage workers, but number is growing ..... 1063
First-class conveyor serves Springs bleachery ..... 1100
Fuel saving in the mill ..... 971
Gaffney Manufacturing Company—Gaffney, South Carolina ..... 1065
Getting production ..... 971
Good personnel ..... 1007
Hints on motor maintenance ..... 972
How big are profits ..... 1035
How warehouse capacity was increased 600% ..... 1101

Textile Mills *(continued)* H

Information racks provide helpful service to Huntsville's employees ... 1007
Know your labor costs ... 1101
Lubricating training program ... 1064
Lydia Cottonn Mills ... 1123
Materials handling short-hand ... 970
Maybe it won't happen in the South ... 1007
Mills helped to efficiency by Institute ... 1105
Modern equipment and processing review—13th ... 1119
Natural gas comes to the Piedmont ... 1101
New conveyor equipment eases automatic spooler bobbin feeding ... 1101
New developments in measurements of high relative humidities ... 1035
New "fluorescent ink" ... 1063
New humidifying unit is self contained and versatile ... 1102
New multi-brush air filter ... 1034
New power plant serves two woolen plants ... 1102
New students registered at ITT ... 1065
Oil-fired boilers advantageous ... 972
Operation of synchronous motors ... 1007
Pepperell's new cafeteria makes hungry workers happy ... 1103
Power in textile plants is more than incidental item ... 972
Pressure-sensitive tapes in textiles ... 972
Pro and con of pension plans and profit-sharing systems ... 1064
Saco-Lowell is moving force in major textile machinery advances ... 973
Some southern mill people have a textile heritage almost a thousand years old ... 1103
Spiral plate heat exchangers ... 1064
Stretching automatic motions to the limit ... 1035
Systematic cleaning of lamps, fixtures ... 973
Synthetics-cotton battle boon to cloth research ... 973
Tests can help you select second hands ... 1103
Textile industry public relations called poor, new outlook needed ... 1103
Textile insurance coverage runs to uncalculated billions ... 1065
Three yarn processing improvements announced by Saco-Lowell ... 1102
Training and communications ... 1065
Trend of trade ... 1103
Unique system for recording maintenance data ... 973
U. S. aid to foreign textiles ... 1104
Use a steam accumulator for a constant steam supply ... 1103
Vacations bring rest and zest to mill towns 1008

Textile Mills *(continued)* H

Von Bergen slated to receive Olney medal award of AATCC ... 1008
We make a little loom motor do a big job ... 1104
What about off-the-job safety? ... 1104
When is employee health a concern of management? ... 1104
Wool's battle with the synthetics ... 973

## CHEMISTRY AND PHYSICS OF TEXTILE MATERIALS I

Accelerated weathering of textiles ... 1065
Action of alkali and acid on cellulose ... 977
Action of cyanuric chloride on cotton cellulose ... 1066
Action of ketones on protein polyamide and cellulose fibers ... 1012
Aerodynamic properties of screens and fabrics ... 973
American Chemical Society ... 1035
Analysis of dyers for man-made fibers ... 1066
Analysis of staple fiber mixtures ... 1035
Analytical methods for determining the presence of polyacrylic compounds ... 1036
Anti-static agents ... 1123
Attack of cellulose by solutions of sodium chlorite—Parts III and IV ... 1036
Birefringence and refractive index of synthetic fibers ... 1036
Capillary phenomena in assemblies of fibers 1105
Cellophane ... 1105
Centrifuge studies Part II ... 974
Constitution and texture of native cellulose ... 1008
Cotton seed meal as a tire cord-to-rubber adhesive ... 1008
Crease properties of fabrics ... 1009
Cyclic recurring constant elongation limitation ... 1036
Decomposition of cellulose ... 1037
Degradation and dissolution of viscose staple during sulphur dyeing ... 1009
Degradation of cellulose by solutions of sodium chlorite in an acid medium ... 975
Degradation of cellulose fibers in acid medium ... 1106
Degradation of long chain molecules as a reverse polymerization process ... 1106
Deformation process in cellulose gels through complete x-ray orientation measurements ... 1041
Delustered rayon ... 1009
Determination of melamine resin deposits in cellulosic fibers and fabrics ... 1066

Chemistry and Physics of Textile Materials *(continued)* I

Determination of the swelling power of cellulose ... 1067
Determination of water in textiles ... 975
Distribution of substituents in partially substituted carboxy-methylcelluloses ... 1106
Double refraction measurements of fibers ... 1066
Dynamic modulus of elasticity of regenerated cellulose fibers ... 975
Effect of humidity on cross-sectional swelling of fibers ... 1037
Effect of light on textile fibers ... 1012
Effect of moisture studied on cottons ... 977
Effect of temperature of preparation on the mechanical properties and structure of gelatin films ... 977
Elastic yarns ... 1010
Electronic applications to textile technology ... 1127
Enzymatic desizing of fabrics ... 1010
Etherification of cellulose ... 1123
Evaluation of detergents (ASTM papers) ... 1125
Fabric soiling ... 1067
Fiber society ... 1037
Heat-seal adhesives ... 1124
High polymeric materials—Ratio of tensile strength to melt viscosity ... 1125
Influence of the structure of cellulose on certain properties of regenerated fibers ... 1038
Measurement—thickness transparent films ... 1124
Measurement viscose swelling ... 1124
Measuring static on loose fibers ... 1011
Mechanical and chemical sizing of pure viscose and viscose blended with acetate ... 1038
Mechanics of bent yarns ... 1126
Mechanisms of the deformation of fibers ... 1038
Mercerization of cellulose—I ... 1039
Mercerization of cellulose—II ... 1039
Mercerization of yarn ... 1039
Micellar lattice of high-molecular fiber substances ... 1012
Microtome prepares sections for electron microscope ... 1125
Movement of water vapour through textiles ... 1040

Chemistry and Physics of Textile Materials *(continued)* I

Optimal twist in staple yarn ... 1040
Permutoid character of xanthogenation of fibers ... 1125
Photochemical degradation of dull finish viscose rayon ... 975
Resin forming reaction of furfural and phenol ... 1126
Review of Textile research and development during 1951 ... 978
Role of the hemicellulose in the mechanism of wet strength ... 1013
Shrinkage of cellulosic fabrics ... 1011
Some observations of the wetting of greige cotton ... 976
Structural changes occurring in viscose rayons by stretching ... 1041
Swelling capacities of fibers in water ... 976
Swiss standards—textiles ... 1125
Theory of photolysis of textile fibers ... 1042
Thermally contracted collagen ... 1126
Ultrasonics in textiles ... 1127
Urea-formaldehyde and melamine-formaldehyde condensations ... 1124
Viscosity measurements ... 977
X-ray small-angle measurements ... 1013

**TEXTILE EDUCATION AND RESEARCH J**

Aluminum foil utilized in fire protective clothing ... 956
Armed forces reap benefits of Southern Research Laboratory ... 1013
Effect of moisture studied on cotton ... 977
Pneumastop—milepost for roving frames ... 1048
Quality control conference ... 978
Review of Textile Research and Development during 1951 ... 978
Research leading to expansion ... 1014
Textile progress through education and research ... 1048
Use of statistical methods in research ... 1015
Winding at constant tension ... 1015

## *How To Obtain Copies Of Patents*

U. S. patents may be obtained from the U. S. Patent Office, Washington 25, D. C., at 25 cents per copy.

Foreign patents are available in photostatic copies from the U. S. Patent Office Washington 25, D. C. Charges for photostats of foreign patents are based upon the number of pages in the patent.

German patent applications and other reports listed by PB report number may be obtained in microfilm or photostat from the Library of Congress, Photoduplication Service, Publication Board Project, Washington 25, D. C.

Canadian patents may be obtained from the Commissioner of Patents, Ottawa, Canada. Printed copies of Canadian patents issued since January 1, 1949, are now available and may be purchased at 25¢ for a copy of less than 50 sheets of printed matter. For patents of over 50 sheets the price is $1.00 a copy.

Abstracts of British patents are obtained from Abridgements of Specifications and are used by permission of the Controller of His Britannic Majesty's Stationary Office. Official Abridgments of Specifications can be obtained from the British Patent Office, 25 Southampton Building, London W.C.2, price 10/– each (inland; 15/– abroad).

Abstracts of U. S. patents are prepared from copies of the patents. Abstracts of Australian patents are taken from *The Australian Official Journal of Patents, Trade Marks, and Designs.* Abstracts of Canadian patents are prepared from claims published in *The Canadian Patent Office Record.*
